Den,

Here's my draft that I would like to discuss tomorrow at the 9am conference call among the OSCs. Of course, you and Jerry are invited to participate if you wish....

I am sending this draft to you to give you an idea for briefing Shawn and Ron as to where we are going with the Administrator's suggestion to sample throughout the site area. As you can see, we are basing that sampling on the rationale we have already developed. Applying that rationale would result in sampling at least 50 or more homes. The priority categories are estimated, except for the last one. the last priority category can't be estimated at this time, but will be based upon scientific information, along with input from the Water Division and ATSDR.

I also tried to deal with some of the other comments, but not sure that I got them all. Humane needs to add the language for the Policy section.

Rich
